Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/574,446

Applicant(s)

LOEBL ET AL.

Examiner

Jaydi A. San Martin

Art Unit

2834

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 September 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-4 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-4 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Feucht et al (US 2006/0125489) in view of Kobrin.

Feucht discloses (see figure 2) a sensor having a piezoelectric layer (4), and electrodes (5, 6) formed on the top of the piezoelectric layer, wherein a sensing layer (8) covers, at least partially, the electrodes.

However, Feucht fails to disclose the resonator comprising an acoustic reflector formed between the piezoelectric layer and a substrate.

Kobrin discloses the use of the acoustic reflector to provide acoustic isolation between the thin film acoustic resonator and the substrate. Therefore, it would have been obvious at the time of the invention was made to use the reflector as disclosed by Kobrin to provide acoustic isolation.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Feucht et al (US 2006/0125489) in view of Kim et al. (US 6293136)

Feucht discloses the invention as explained above, but fails to disclose the sensor comprising an acoustic reflector, the first, and the second electrode being interdigitated

electrode, the sensor comprises a plurality of individually addressable resonator, and the sensing layers of the different resonators comprising different materials.

Kim discloses the idt's, the acoustic reflector, and different coatings.

Kim's invention eliminates the need to provide other relatively more complicated temperature compensating structure or to maintain the device at a predetermined constant temperature, and further discloses that the invention can be used to detect different chemicals or substances. Therefore, it would have been obvious at the time of the invention was made to use idt's, an acoustic reflector and different sensing layers to have a sensor which can be used at different temperatures and a sensor that could measure different substances.

Response to Arguments

3. Applicant's arguments filed 9/10/2007 have been fully considered but they are not persuasive.

4. Applicants argue that the combination of Feucht and Kobrin fails to disclose the claimed invention. As explained above, in figure 2 Feucht discloses a piezoelectric sensor where electrodes 5 and 6 (which are located on the same side of the substrate) are covered by a sensing layer 8, with a coating 10 capable of absorbing chemicals, as disclosed in the detailed description of figure 2.

5. The use of acoustic reflectors is old and known in the art. It is the Examiner's position that one with ordinary skill in the art would recognize the advantages of using an acoustic reflector to reflect the vibrations to improve the response of the piezoelectric sensor.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jaydi A. San Martin whose telephone number is 571-272-2018. The examiner can normally be reached on M-Th 9-7.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Darren E. Schuberg can be reached on 571-272-2044. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
